Art Unit: 1644

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 2/16/07 has been entered.

2. Claims 56 and 57 are under consideration.

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. The rejection of claims 56 and 57 under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement for the reasons elaborated in the previous Office Action is withdrawn in view of the amended claims.

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to

consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. The rejection of claim 56 under 35 U.S.C. 103(a) as being unpatentable over Chada et al. (US Patent 5,693,522) in view of Herlyn et al. (WO 95/29995) for the reasons elaborated in the previous Office Action is withdrawn in view of the amended claim.

7. The rejection of claim 56 under 35 U.S.C. 103(a) as being unpatentable over Berzofsky et al. (WO 94/21287) in view of Herlyn et al. (WO 95/29995) for the reasons elaborated in the previous Office Action is withdrawn in view of the amended claim.

8. Claims 56 and 57 are allowed.

9. This application is in condition for allowance except for the following formal matters.

a) The abstract of the disclosure is objected to because it does not disclosed the claimed method (aka the method of claim 56). Correction is required. See MPEP § 608.01(b).

b) Applicant is required to update the status of all US applications disclosed in the instant application (including on page 1).

c) The use of the trademarks 3D-MPL, MPL, RC-529, MONTANIDE ISA 720, AS-2 and numerous others has been noted in this application. They should be capitalized wherever they appear and be accompanied by the generic terminology.

Although the use of trademarks is permissible in patent applications, the proprietary nature of the marks should be respected and every effort made to prevent their use in any manner which might adversely affect their validity as trademarks.

d) The amendment filed 9/10/2003 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows. The incorporation by reference statement as it applies to application 09/684361. Whilst the

Art Unit: 1644

other two parent applications were incorporated by reference as per the originally filed specification, a priority claim to 09/684361 was added after the instant application was first filed and there is no support in the specification as originally filed for the incorporation by reference to application 09684361.

Applicant is required to cancel the new matter in the reply to this Office Action.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
